* Transports marked by an asterisk consisted mainly of closed cars whose content was given only insofar as it could be reliably determined.

EM and officers of the "leave trains" belonged to various branches of the service. Most of the men travelled without weapons.

The new RR freight cars, which were piled upon each other, are for the most part regular flat cars (Plattenwagen) which have been built for the Russian RR gauge. There were also some small mine railway cars. Most of the cars were without wheels.

2. During the same period, i.e. between 7 May and 19 June, 236 empty trains returned from Russia and passed through Frankfurt/Oder on their way to Germany. In addition, the following westbound transports were observed:

a. Military Transports
